ETH∅R

sElf-evolving terrestrial/non-Terrestrial Hybrid nEtwoRks

ETHER is going to provide a framework for the terrestrial/non-terrestrial network ecosystem that involves an efficient and zero-touch resource management, provides solution for key radio access network (RAN) challenges, and identifies the business opportunities for potential stakeholders.

- Flexible payload-enabled service provisioning to semantics aware and delay-tolerant IoT applications

- Unified RAN for direct handheld device access at the Ka band

- Architecture demonstration for air-space safety critical operations
